

U.S. Edition

Sage 50 Accounting 2014

Release Overview

Make your business life easier with Sage 50 Accounting, the solution that adapts to your needs and helps you organize and manage your business. Sage 50 is designed and delivered by people who understand small businesses and are ready to give you relevant advice and support when and where you need it. It's an easy-to-use solution that comes with robust core accounting and business management features along with service and support you can trust. You will save time and money and accomplish more every day with Sage 50 Accounting.

This release of the Sage 50 Accounting product line simplifies everyday tasks so you can **get the right work done**. It also includes tools that **provide guidance** to help you **make informed business decisions**, and lets you **customize and adapt** Sage 50 to meet your needs.

NEW! Accounts Receivable Enhancements

It's faster and easier to record outstanding customer invoices as paid. This feature reduces the number of steps necessary in receiving money for outstanding invoices and gives you access to all the information you need.

IMPROVED! Streamlined Accounts Payable

Now you can take care of payments and purchases in fewer steps, with fewer screens. With more quick links to information and reports, more critical dates displayed, and more options to pay invoices, Sage 50 delivers an array of time-saving ease-of-use enhancements on the "Purchase/Receive Inventory" screen.

IMPROVED! More Efficient Invoicing

Invoicing new and existing customers is faster than ever, and you have greater insight into customer information on the fly. This enhancement saves you time by alerting you to customer credit issues during the estimating process, rather than at the invoicing stage. It also gives you quick access to related customer information or reports that you might need while creating an invoice and displays critical due dates, payment dates, and credit status messages (Ex: Notify Over Limit) when you select a customer.

IMPROVED! Quote Status List

The Quote List now has an option that shows the status of all your quotes without having to open each quote. With easier access to the status of your quotes, you can follow up on open quotes before they expire, quickly identify quotes that have been converted into sales, and ensure that your prices are current and consistent for each customer.

NEW! Compatible with Windows 8

Sage 50 continues to be built on modern technologies to ensure that you consistently receive outstanding service and support.

IMPROVED! Easy Start with Sage Advisor

You can get up and running quickly with the Sage Advisor Launchpad and Sage Advisor Messages. These tools help you understand the whys, whats and hows of important features, including dashboards and reports. If you're seeking a seamless transition from QuickBooks®, Sage Advisor also includes a QuickBooks Conversion Guide.
